Michał Lutecki

Junior Front End Developer

I've started the adventure with programming in 2017 from watching a few lectures on programming. This prompted me to do several courses with HTML, CSS and JavaScript, after this completion of these courses I wanted to expand in this direction and decided to take part in Bootcamp organized by CodersLab. I want to work up to my skills in JavaScript and its libraries as well as in the future to get knowledge about Back-End.

Projects

MoGo- Template

preview   *code*

One page responsive website based on PSD template. Functionality: in section map column INSTAGRAM there is lightbox, in section service you can show/ hide text, sticky navbar and button(scrollTop)
Technologies used: HTML, CSS, JavaScript.
